

User Guide for the Adolescent Data Hub

www.popcouncil.org/girlcenter/adolescentdatahub

The **Adolescent Data Hub** is a resource for researchers, organizations, and other stakeholders to share and access data on adolescents and young people living in low- and middle-income countries. This unique global portal includes information on datasets that meet the following criteria:

- 1. Individual level interviews of females and/or males ages 10-24 years;
- 2. One or more rounds of data collected in year 2000 or later;
- 3. Data are publicly available; and
- 4. Data are collected in low- and middle-income countries.

GIRL & Center Adolescent Data Hub About Join Us

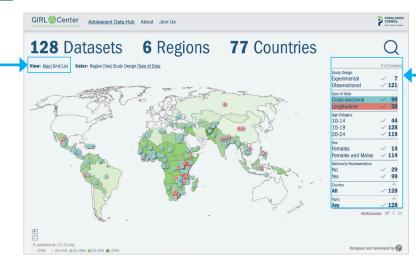

GETTING STARTED

Select your viewing format

Explore data sources by displaying search results in one of three views: Map, Grid, List.

Each viewing format provides access to **Data Cards** that feature key information about the data source, a brief country profile, and links to both the study site and data download webpage.

The search criteria specified in the filtering tool (*right*) will remain stationary as you switch between viewing formats.

Select your filters

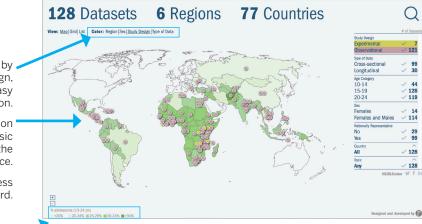

Filter data sources by study design, type of data, age category, sex, country, or topic.

The filtering tool is featured across all three viewing formats of the portal and can be updated at any point:

- Check or uncheck the categories to expand or restrict your search;
- The numbers of available datasets are displayed and will be updated based on your selection criteria.

MAP VIEW

The Map view is an easy way to view the geographic variation of available data while filtering according to selected criteria.

Hover over each country for statistics on key sociodemographic indictors.

Color the data sources by region, sex, study design, or type of data for easy visualization.

Hover over each dot on the map to access basic information about the respective data source.

Click on the dot to access the data card.

Varying shades of green are used to identify the **percent** of the population who are adolescents in each country.

The Grid view allows you to systematically organize data sources based on selected criteria to further define your search.

Color the data sources by region, sex, study design, or type of data. If categorizing by region, use the dropdown list of countries at the bottom of the filtering tool to identify the colors and corresponding regions

Group the data sources by region, age category, or sex.

LIST VIEW

Order the data sources chronologically (by most recent source) or alphabetically.

SEARCH

The Search function allows you to search for data using specific search terms.

Enter specific search terms (such as the name of a study or funder) to browse available data.

Use key search terms after filtering according to certain criteria.
